## CALL FOR PAPERS

Environmental concerns and an increasing awareness of the circular economy have led to a dramatic increase in interest in the use of biobased and recycled polymers and materials over recent years (thermoplastic and thermoset resins and matrices, reinforcements...) resulting in considerable scientific and technological developments.

The processing of these high added-value polymers and materials into final products has incited extensive research by academic and industrial laboratories on the processing, morphology, structure and properties of these materials when they are being implemented in blends and composites.

However, the substitution of petroleum-based raw materials still remains a great challenge. This congress aims to foster understanding, scientific and technical progress and recent knowledge in the following two fields: biobased and recycled materials.

During this congress, a variety of themes will be explored such as:

- the sourcing of bio-based and recycled materials,
- their properties (benefits and drawbacks, rheology, quality, regularity, durability, characterization, life-cycle...
- (for biobased reinforcements) their compatibility with the matrices, the use of possible pre-treatments, the simulation and the optimization of their processings,
- and their applications.

**All these items will be discussed through industrial and academic talks and papers. The scientific viewpoint will be developed and balanced against industrial expectations and constraints for new applications in fields such as transportation, building, sport, leisure, packaging...**

Following its two previous congresses (Paris 2013 and Alençon 2014) and as part of its mission to give regular updates on these targets – **SFIP** is co-organizing a new congress with **ISPA** and **IMT Lille Douai**:

**ECO-PLASTICS: GO WITH BIOBASED OR RECYCLED MATERIALS!**

If you are interested in giving a paper, please use page 3 form to submit your proposal with an abstract on an A4 page maximum (page 4) and send them to [chantal.sohm@sfip-plastic.org](mailto:chantal.sohm@sfip-plastic.org) as of now, or by April 5, 2018.

## SUBMISSION FORM / CALL FOR PAPERS

### DEADLINE FOR PROPOSALS SUBMISSION: THURSDAY APRIL 5, 2018

**Speaker**

Company:.....  
Title:..... Forename: ..... Surname:.....  
Position:.....  
Full address: .....  
Phone:..... Mobile:..... E-mail :.....

**Co-speaker**  **Co-author**

Company:.....  
Title:..... Forename: ..... Surname:.....  
Position:.....  
Full address: .....  
Phone:..... Mobile:..... E-mail :.....

**Co-speaker**  **Co-author**

Company:.....  
Title:..... Forename: ..... Surname:.....  
Position:.....  
Full address: .....  
Phone:..... Mobile:..... E-mail :.....

**Title of paper:** .....

**Have you already given this paper? And if so, where and when?** .....

**Abstract:** one A4 page maximum. To be inserted in page 4 of this document.

**Useful information:**

- 20 minutes will be allocated to each presentation and 5-10 minutes to questions/answers.
- Presentation speaking language: French or English.
- **Slides in English** (with maximum one slide dedicated to company presentation and one for portfolio).

**An exhibition will be held during both days:**

- We wish to have a booth on site and require information about it:  YES  NO
- We wish to be sponsor and require information about it:  YES  NO

**Documents to be sent by  
April 5, 2018 to:  
chantal.sohm@sfip-plastic.org  
SFIP - Le Diamant A  
F - 92909 Paris la Défense Cedex  
Tel. 33 1 46531074**

**Attention :**

- All companies selected by the organizers undertake to give the paper on the day of the congress.
- Our speakers are invited to the conference days including breaks, lunches and dinner (at their expense: travel and accommodation during the rehearsal and conference).
- In the case of a co-presentation (two speakers) of the same company, only one speaker is free of participation fees.

**Title of the paper:**

**Abstract:**

Please send to
